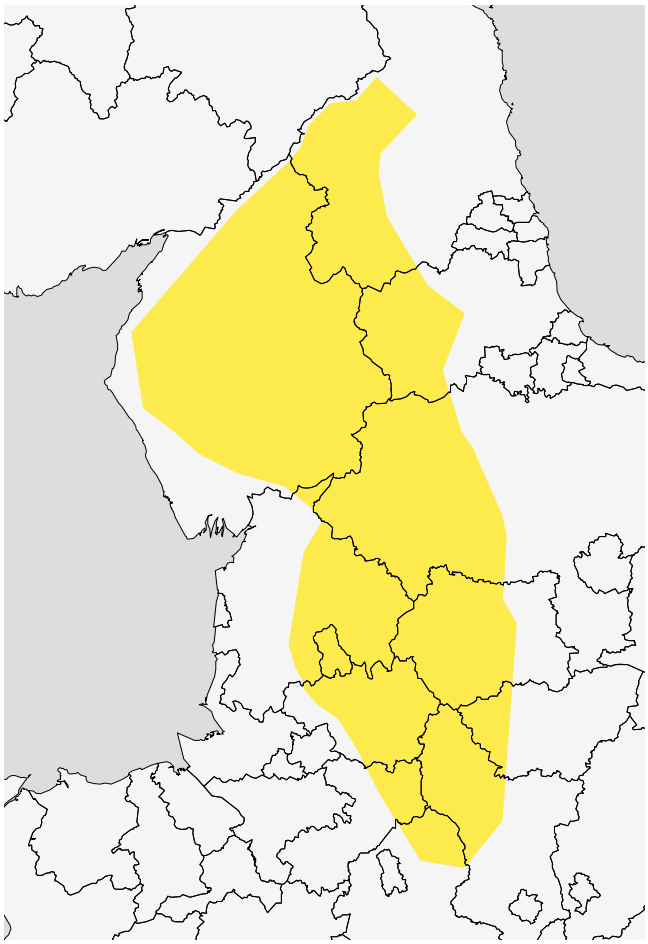
Yellow warning
Snow & Ice

Between
15:00 Mon 10 Feb 2020 and
23:59 Tue 11 Feb 2020



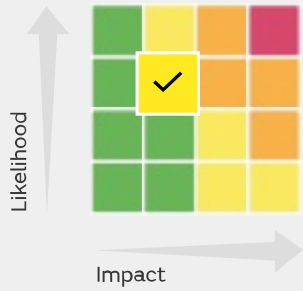
Heavy snow showers and icy surfaces are likely to lead to travel disruption, particularly over higher routes.

What to expect

- Some roads and railways likely to be affected with longer journey times by road, bus and train services
- Some injuries from slips and falls on icy surfaces
- Probably some icy patches on some untreated roads, pavements and cycle paths

Further details

Showers will turn increasingly to snow later on Monday, becoming frequent and heavy at times and lasting through Tuesday. The snow showers will occur particularly over high ground giving locally 1-3 cm above around 150 metres and 3-8 cm above 300 metres. Snow will gradually build, perhaps leading to accumulation of 10-15 cm on the highest routes. Any snow accumulations over low ground are likely to be temporary. Icy surfaces are likely to cause problems, especially overnight.



✓ Medium likelihood of low impacts
